

BIO DEUTSCHLAND

European Business Development Conference

7 – 8 October 2014 | Dresden | Germany

Petra Streng

Petra Streng is Solution Manager in SAP's Industry Business Unit for Life Sciences and focuses on R&D topics. This includes SAP's Product Lifecycle Management and LIMS solutions and now with the advent of SAP's HANA® Innovation Platform also topics like real-life evidence data, Clinical Data Warehouses, and Big Data in the Genomics and Proteomics area.

Petra Streng is a Medical Computer Scientist from the University of Heidelberg and has been with SAP since 1995. Initially she joined the Healthcare department, developing SAP's Hospital Information Management solution and data exchange procedures with insurances and ministries of health around the globe. She was partner alliance manager for many SAP R&D partners, product engineer for SAP's Business Suite and built the first chemical marketplace as well as the rapid deployment solution for remote patient engagement.

She is angel investor in some Cloud companies, interested in leveraging novel technologies to advance medical research, enhance medical insights and improve medical treatment options.
